

**Amendment to the Specification:**

Please replace paragraph [0001]

[0001] This application is related to U.S. patent application Ser. No. \_\_\_\_\_ 10/830,329 docket number DS03-025, U.S. Ser. No. \_\_\_\_\_ filed \_\_\_\_\_ April 27, 2004 and assigned to the same assignee as the present invention.

Please replace paragraph [0020]

[0020] The preferred embodiments disclose a novel method to zoom digital images.

Said method is based on the methods to convert the resolution of digital images disclosed with U.S. patent application Ser. No. 10/830,329 docket number DS03-025, filed April 27, 2004 and assigned to the same assignee as the present invention. In order to be able to use said methods to convert the resolution for zooming the region of interest of the source image has to be defined prior to a change of resolution and the offsets have to be defined in a special way. The methods of the present invention apply to video images as well as to still images of a digital camera.
